

# MOTORCYCLE CLEANING

Cleaning tips that will help you clean your motorcycle faster, easier and without damaging it!

## **YOU WILL NEED:**

- **Soft cloths – for washing, drying & polishing**

**\*\*NOTE:** Wash mitts & sponges are good, but *ONLY* if they are clean!

-A dirty mitt or sponge can contain dirt, which could scratch paint and chrome.

- **Cleaning solutions, made specifically for type of cleaning**

**\*\*NOTE:** The *WRONG* product could cause problems, leading to discoloring the finish or “blue” of the chrome.

- **Wheel Cleaner, made specifically for your type of wheels.**

*Most importantly...*

- **Buckets & Water**

## **\*\*SPECIAL NOTE:**

Use a **DIFFERENT** mitt or sponge for your (1) Paint and Chrome and (2) Wheels

## **\*\*\*DO NOT WASH a HOT BIKE!**

You could cause spotting, streaking and damage of the chrome

Or, crack the engine. Be sure to let it cool down before washing!

Please stop by Harley-Davidson of Frederick or Williamsport for service or any questions regarding your bike!

“Now that it’s looking good, LET’S RIDE!”

*A tip brought to you by your service manager at Harley-Davidson of Frederick, Ron.*
